

Are LLMs truly learning while being guided by the Reward Model?

(1) Large Language Models

 : User satisfied!

But...

LLMs were being sycophantic!

(2) Multimodal Language Models

 : Bird found!

But...

MLMs were taking shortcuts!

(3) Visual Generative Models

 : Yes! A dog!

But...

VGMs generated incorrect objects!

(4) Agentic Models

 : Check passed!

But...

AMs bypassed the actual tasks!
